

Healthy Volunteers

A Pharmacokinetic Study of [14C]-GDC-0810 After Single Oral Administration in Healthy Female Participants

Trial Status
Completed

Trial Runs In
1 Countries

Trial Identifier
NCT02802670 GP29916

The source of the below information is the publicly available website ClinicalTrials.gov. It has been summarised and edited into simpler language.

Trial Summary:

This is an open-label, non-randomized study to determine the excretion kinetics and mass balance of GDC-0810, and to determine metabolites present in blood, feces, and urine in healthy participants following a single 300-milligram (mg) oral dose of GDC-0810 containing approximately 100 microcuries of [14C] labeled GDC-0810 using conventional absorption, metabolism, and excretion (AME) methodology. The entire duration of the study is up to approximately 8 weeks.
