Trial Identifier
NCT02902640 ML30018

The source of the below information is the publicly available website ClinicalTrials.gov. It has been summarised and edited into simpler language.

Trial Summary:

This is a pilot, observational and multicentric study of safety of sulfamethoxazole + trimethoprim + guaifenesin (Balsamic Bactrim) in adult participants with acute bronchitis. Adult participants with acute bronchitis eligible for treatment with Balsamic Bactrim will be enrolled. Administration of Balsamic Bactrim will be according to physician's recommendation under local labeling.
