Trial Summary:

The purpose of this study is to determine the efficacy and safety of omalizumab compared with placebo in adult participants with chronic rhinosinusitis with nasal polyps (CRSwNP) who have had an inadequate response to standard-of-care treatments. Study GA39855 (POLYP 2; NCT03280537) was another Phase III study by the Sponsor with identical objectives and design and was run in parallel with this study.
