

Hemophilia A

Study of Emicizumab Prophylaxis in Participants With Hemophilia A and Inhibitors Undergoing Minor Surgical Procedures

Trial Status
Terminated

Trial Runs In
1 Countries

Trial Identifier
NCT03361137 ML39791

The source of the below information is the publicly available website ClinicalTrials.gov. It has been summarised and edited into simpler language.

Trial Summary:

This Phase IV, multicenter study will evaluate whether participants with Hemophilia A (PwHA) with or without inhibitors receiving emicizumab prophylaxis can safely undergo minor surgical procedures without additional prophylactic bypassing agents (BPA; for participants with inhibitors) or factor VIII (FVIII; for participants without inhibitors).
