

Cancer

A Performance and Bioavailability Study of Entrectinib in Healthy Volunteers.

Trial Status
Completed

Trial Runs In
1 Countries

Trial Identifier
NCT03961100 2019-000783-15
GP41341

The source of the below information is the publicly available website ClinicalTrials.gov. It has been summarised and edited into simpler language.

Trial Summary:

This study will evaluate the bioavailability, palatability, safety and tolerability of entrectinib in healthy volunteers. Part 1 of the study will explore the performance of entrectinib multi-particle formulation. Part 2 will evaluate the effect of drug substance particle size on entrectinib bioavailability.
