

Non-Small Cell Lung Cancer (NSCLC) Small Cell Lung Cancer Lung Cancer

Prospective Clinicogenomic Program

Trial Status
Completed

Trial Runs In
1 Countries

Trial Identifier
NCT04180176 GX41563

The source of the below information is the publicly available website ClinicalTrials.gov. It has been summarised and edited into simpler language.

Trial Summary:

The main purpose of this study is to evaluate the feasibility of a scalable, prospective research program for participants with metastatic non-small cell lung cancer (mNSCLC) or extensive-stage small-cell lung cancer (ES-SCLC) planning to start standard-of-care (SOC) systemic anti-cancer treatment. The study will also examine ctDNA status over the course of treatment as a predictor of response to therapy.
