Trial Identifier
NCT05949580 MN44358

The source of the below information is the publicly available website ClinicalTrials.gov. It has been summarised and edited into simpler language.

Trial Summary:

The main purpose of this study is to assess the usability and value of the multiple sclerosis (MS) care management platform in terms of improved monitoring of people with MS (pwMS) in clinical practice. This is a two-year prospective data collection study with additional data collection at baseline evaluating medical practice over a period of at least one year before the introduction of the MS care management platform.
