

Age-Related Macular Degeneration

**A Study to Assess the Efficacy and Safety of RO7965032 in
Participants With Geographic Atrophy Secondary to Age-Related
Macular Degeneration**

Trial Status Not yet recruiting	Trial Runs In	Trial Identifier NCT07851259 2026-527027-10-00 XR46785
---	----------------------	---

The information is taken directly from public registry websites such as ClinicalTrials.gov, EuClinicalTrials.eu, ISRCTN.com, etc., and has not been edited.

Official Title:

A Phase II, Randomized, Double-Masked, Placebo-Controlled Multicenter Study to Assess the Efficacy and Safety of RO7965032 in Patients With Geographic Atrophy Secondary to Age-Related Macular Degeneration

Trial Summary:

This study will assess the safety and efficacy of RO7965032 to address a significant unmet medical need in participants with geographic atrophy (GA) secondary to age-related macular degeneration (AMD)

Genentech, Inc. Sponsor	Phase 2 Phase
NCT07851259 2026-527027-10-00 XR46785 Trial Identifiers	

Eligibility Criteria:

Gender All	Age #50 Years	Healthy Volunteers No
----------------------	-------------------------	---------------------------------

Inclusion Criteria:

Ocular Inclusion Criteria for the Study Eye

- BCVA score of $\geq$ 35 letters using the ETDRS VA chart at a starting distance of 4 meters
- Lesions may be either extrafoveal or subfoveal

Ocular Inclusion Criteria for Both Eyes

- Sufficiently clear ocular media, adequate pupillary dilation, and fixation to permit quality fundus imaging
- Well-demarcated GA secondary to AMD

Exclusion Criteria:

General Exclusion Criteria - History of hypersensitivity, a severe allergic reaction or anaphylactic reaction to any component of the investigational drug injection

Ocular Exclusion Criteria for the Study Eye

- History of diabetic macular edema (DME), retinal vein occlusion, corneal transplant, retinal detachment, Stage 3 or 4 macular hole, optic neuropathy, or retinal dystrophy
- Current or prior history of central serous retinopathy
- Aphakia or absence of the posterior capsule in the study eye

Ocular Exclusion Criteria for the Non-Study Eye

- Non-functioning non-study eye defined as either BCVA of hand motion or worse or no physical presence of non-study eye (i.e., monocular)

Ocular Exclusion Criteria for Either Eye

- Proliferative diabetic retinopathy
- History of recurrent infectious or inflammatory ocular disease
- Current or prior history of choroidal neovascularization (CNV) in either eye
- Active, infectious conjunctivitis, keratitis, scleritis, or endophthalmitis in either eye

Other protocol-defined inclusion/exclusion criteria may apply
