

Diabetic Macular EdemaWet Age-Related Macular Degeneration

A Study Conducted to Evaluate the Conjunctiva and Tenon's Capsule Status of Healthy Subjects and in Participants With Neovascular Age-related Macular Degeneration (nAMD)/Diabetic Macular Edema (DME)

Trial Status
Completed

Trial Runs In
1 Country

Trial Identifier
NCT06723288 MR45734

The information is taken directly from public registry websites such as ClinicalTrials.gov, EuClinicalTrials.eu, ISRCTN.com, etc., and has not been edited.

Official Title:

A Multicenter, Cross-sectional Study to Describe the Conjunctiva and Tenon's Capsule Status of Healthy Subjects and nAMD/DME Patients Followed in Clinical Practice in Spain

Trial Summary:

The purpose of this study is to obtain conjunctiva and tenon's capsule thickness measurements in vivo using spectral domain-optical coherence tomography (SD-OCT) in participants with nAMD/DME and age-matched healthy subjects.

Eligibility Criteria:

Gender
All

Age
#45 Years

Healthy Volunteers
Yes

Inclusion Criteria:

For nAMD/DME participants:

- Diagnosis of nAMD/DME

ForPatients

by Roche

For healthy subjects:

- Normal visual function

Exclusion Criteria:

- Current or past treatment for glaucoma (only for healthy subjects)
- Dry eye disease except those treated only with artificial tears
- Ocular hypertension treated with hypotensive drugs
- Pterygium
- Strabismus
- Previous ocular surgery except cataract surgery
- Cataract surgery with scleral incision
- Current contact lens wearers
- Myopia with more than 6 diopters
- Corneal transplant
- History of ocular surface inflammation
- Active or recent conjunctivitis infection
- Pregnancy
- Participant who has already received an IVT injection in the superotemporal quadrant (only for nAMD/DME participants)
